Frontend Development, Angular (2+), TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Bootstrap, Angular Material, PrimeNg, RxJS, NgRx, MySQL, SaaS, Database Design, AWS, Git, Jest, Jasmine, Karma, Postman, ESLint, SAST, SonarQube, Agile, Microservices, Component-Based Design

Education

B.Tech (Electronics and Telecommunication)

PRPCEM
Jul 2017 - May 2021

Awards

Star of the Month (May 2022):
Recognized for delivering a critical module ahead of schedule with zero defects.

Star of the Month (August 2024):
Awarded for implementing innovative solutions that improved team efficiency.

Certifications

- [Google Cloud Associate Cloud Engineer](#)
- [AWS Certified Developer - Associate](#)

Work Experience

Tata Consultancy Services (TCS)

Nov 2022 - Present

Senior Angular Developer

Developed Unified Communication Hub (UCH), a SaaS-based CRM platform enabling omni-channel communication, dynamic template design, XML data mapping, and multi-channel document generation, optimized with Angular 18 and TypeScript library migration.

- Led a team of 5 developers to build an omnichannel support platform, achieving 98% sprint success and reducing customer response time by 35%.
- Engineered a custom TypeScript library to optimize template rendering, improving application performance by 40% and reducing bundle size by 30%.
- Migrated applications from Angular 15 to Angular 18, including comprehensive updates to Angular Material, maintaining zero regression issues.
- Implemented Jest testing framework, increasing code coverage from 65% to 90% and reducing production bugs by 45%.
- Designed a reusable Angular component library, standardizing UI elements across 5+ applications and cutting development time by 50%.
- Established comprehensive documentation and biweekly knowledge-sharing sessions, improving team efficiency by 30%.
- Developed a structured training program, reducing onboarding time for new hires by 40%.

Tata Consultancy Services (TCS)

Aug 2021 - Nov 2022

Angular Developer

Developed a SaaS-based US Retirement Platform for investment banking, featuring automated PDF annotation, secure data handling, advanced reporting, and seamless retirement plan management.

- Developed the "Plan Setup" module for an investment banking platform, streamlining workflows and improving operational efficiency.
- Created schema-driven dynamic forms with auto-filling and PDF-highlighting features, reducing manual effort and enhancing accuracy.
- Implemented LeaderLine npm for dynamic data mappings, improving usability and efficiency.
- Designed a user-friendly interface using responsive design techniques and usability best practices.
- Collaborated with cross-functional teams in an Agile environment to deliver business-aligned technical solutions.
